

AI Audit Report

Declaration: **I use AI tools for the following tasks.**

Interaction 1

- Tool: OpenAI Codex
- Date and time: 2026-09-03, Asia/Bangkok
- Prompt: Phân tích Homework này và lên kế hoạch thực hiện
- Output summary: Analysed all nine pages of the homework, extracted mandatory deliverables and grading criteria, highlighted anti-cheat evidence, and proposed a phased implementation plan.

Interaction 2

- Tool: OpenAI Codex
- Date and time: 2026-09-03, Asia/Bangkok
- Prompt summary: Asked which steps could be automated, which must be performed personally, and what information was required.
- Output summary: Classified technical automation, human-review responsibilities, video and hardware evidence, and required student inputs.

Interaction 3

- Tool: OpenAI Codex
- Date and time: 2026-09-03, Asia/Bangkok
- Prompt summary: Supplied student ID 23127124, selected FR-01/FR-07/FR-17, chose JMeter, requested an efficient backend method and a plan targeting 100 points.
- Output summary: Cloned and inspected the EShop SUT, selected loopback port 3000, prepared portable Java/JMeter, designed a multi-role end-to-end workflow, and generated reproducible test automation assets.

Before submission, replace each output summary with the complete AI output or attach an exported transcript if the course template requires verbatim output.
